MASTERING ENDODONTICS

Oliver Pontius (ed)

Comprehensive Endodontic Therapy

520 pages, 1321 illus.

ISBN 978-1-78698-150-9

€218

 QUINTESSENCE PUBLISHING

This comprehensive guide, edited by Dr Oliver Pontius and co-authored by world-leading international authorities in their respective fields, has been designed for general dental practitioners, postgraduate dental students, and clinicians in other fields of dentistry. It is an up-to-date overview of endodontic knowledge and techniques, providing all the clinically relevant information to incorporate endodontics into general dental practice, emphasizing the relationship of endodontics with other dental disciplines. The book, enhanced by clear visuals and clinical

protocols, is divided into six sections: the science of endodontics, diagnosis, advances in materials and technology, the practice of endodontics, prognosis, and interdisciplinary endodontics. Great importance has been afforded to diagnosis and treatment planning, allowing patient autonomy to make the final decision and always respecting what is in the patient's best interest. Anyone interested in predictable endodontics based on cutting-edge research and sound clinical data should consider reading this book.

CONTENTS

Part A. The Science of Endodontics

- Chapter 01. Keeping the Pulp Alive with Pulp Capping and Pulp Chamber Pulpotomy
- Chapter 02. Microbiology of Endodontic Infections
- Chapter 03. Understanding and Managing Apical Periodontitis
- Chapter 04. Cell-based and Cell-free Regenerative Endodontics

Part B. Diagnosis

- Chapter 05. Endodontic Diagnosis
- Chapter 06. Radiology of Apical Periodontitis, Differential Diagnosis of Nonodontogenic Cystic Lesions
- Chapter 07. Differential Diagnosis of Orofacial Pain

Part C. Advances in Materials and Technology

- Chapter 08. NiTi Instruments in Endodontics
- Chapter 09. Calcium Silicate-based Hydraulic Cements in Endodontics

Part D. The Practice of Endodontics

- Chapter 10. The Aseptic Working Field
- Chapter 11. Endodontic Emergencies
- Chapter 12. Cleaning and Shaping Root Canal Systems
- Chapter 13. Irrigation and Disinfection of the Root Canal System
- Chapter 14. Lasers for Root Canal Cleaning and Disinfection
- Chapter 15. Philosophy of Filling Roots
- Chapter 16. Carrier-based Obturation
- Chapter 17. Endodontic Retreatment
 - (a) Decision making in Endodontic Retreatment
 - (b) Endodontic Retreatment Procedures
 - (c) Predictable and Minimally Invasive Instrument Removal
- Chapter 18. Microsurgical Endodontics
- Chapter 19. Intentional Replantation
- Chapter 20. Predictable Autotransplantation
- Chapter 21. Traumatic Dental Injuries of Permanent Teeth
- Chapter 22. Resorption of Permanent Teeth

Part E. Prognosis

- Chapter 23. Factors Impacting the Outcomes of Nonsurgical Root Canal Treatments

Part F. Interdisciplinary Endodontics

- Chapter 24. Maxillary Sinus Implications in Endodontics
- Chapter 25. Endodontic–Periodontal Interaction
- Chapter 26. The Endo–Restorative Interface
- Chapter 27. Endodontics or Implants – Decisive Criteria and Guidelines for Single Tooth Restorations and Full-arch Reconstructions
- Chapter 28. Endodontic Medicine
